wooden door catalogue 2023

BOARD TECHNOLOGY

THE KEY FEATURE OF THE "P" EXTERIOR DOOR IS THE USE OF INNOVATIVE PRODUCTION TECHNOLOGY

This technology preserves the beauty of wooden doors while eliminating most of the problems associated with traditional board technologies, such as: tearing and shifting of door coffers, warping of leaves, uneven discolouration of individual door elements, cracking and corrugation of veneers, and problems with joint fillers.

ROBUST DESIGN

The door is designed to maintain good thermal and acoustic insulation properties. Our doors feature a pine-meranti or pine-oak frame reinforced with sheet metal and a "C" shaped profile. It is up to you to decide how thick they are to be. The doors can be 72, 82 or 102 mm thick, but their design remains the same. Inside, between the sheathing made of a 7 or 12 mm thick waterproof meranti, pine or oak plywood is a truss filled with polyurethane foam.

SAFETY

All doors are protected with a multipoint lock (or two independent locks), durable and robust hinges, and a sheet metal reinforcement to provide a sense of safety and prevent burglary.

CARE FOR THE ENVIRONMENT

We use environmentally-friendly waterbased varnish and wood from legal Polish forests for our doors. The waste generated during production is collected and recycled, and the production process is safe for our employees.

FINISHING

- ¹⁾ extra charge grain direction can be vertical or horizontal (except for models
- extra charge grain direction can be vertical or horizontal (except for models with deep mill work)

LACQUER

I Hydrodynamic painting with water-based paints according to the Erkado colour range or RAL opaque paints with the ADLER Protor system. Protor is a 2-component exterior door coating system with above-average resistance to weathering and wood-damaging fungi.

Thanks to its high hardness and scratch resistance, the Protor system guarantees extreme durability of exterior doors for years to come.

- The wood used to make veneers differs in terms of colour, texture and consistency. Even a single tree may feature significant differences in this respect. These are the characteristic features of natural wood and may not be claimed
- The presented colours are for illustrative purposes only and should not be used as colour samples.

GLASS LINE

Decorated with a black glass, the Glass line of timber doors perfectly complements modern buildings. Natural wood combined with a glossy black glass is a chic and timeless combination.

Finishing material:

∎ meranti, oak or pine

Design:

- a gasket in the leaf and the frame
- a burglary-proof rebate on the hinges side
- the external surface of the leaf made of waterproof plywood
- internal structure of the leaf in the form of a truss with a polyurethane foam filling
- the leaf tiles made of wood reinforced with sheet metal and a "C" profile

Standard set:

- ∎ thickness: 72 mm
- ∎ two independent bolt locks
- I four hinges adjustable in three planes
- glazing unit REFLEX BRONZE
- an aluminium threshold with a thermal separator or a wooden threshold

INOX LINE

Precious brushed aluminium combined with natural wood to provide top design. The Inox panel additionally protects the door surface against external damage.

Finishing material:

∎ meranti, oak or pine

Design:

- a gasket in the leaf and the frame
- a burglary-proof rebate on the hinges side
- the external surface of the leaf made of waterproof plywood
- internal structure of the leaf in the form of a truss with a polyurethane foam filling
- the leaf tiles made of wood reinforced with sheet metal and a "C" profile

MODERN LINE

WOODEN DOORS

The characteristic feature of this line is its modern-looking milling and glazing. The models are characterized by a coherent design based on geometric figures.

Finishing material:

∎ meranti, oak or pine

Design:

- a gasket in the leaf and the frame
- ∎ a burglary-proof rebate on the hinges side
- the external surface of the leaf made of waterproof plywood
- internal structure of the leaf in the form of a truss with a polyurethane foam filling
- the leaf tiles made of wood reinforced with sheet metal and a "C" profile

Standard set:

INTERIOR WOODEN DOORS

Every house is fitted with interior doors. This is why thinking about doors from the perspective of their functional and practical features has long been insufficient. Underlining the best qualities in a perfectly furnished house, today they are an important component of interior design. For this reason, we create modern solutions, introduce attractive design and focus on the quality of workmanship to let you enjoy the choice of the doors.

LUXZONE

EXTERIOR DOORS 72 mm

Heat transfer coefficient

Ud<0,90 W/m²K

Certificate No. ITB 831/B-2018-13

Material: oak, pine or meranti

Construction

- door leaf thickness 72 mm
- gasket in the leaf and frame
- rebated doors
- outer surface of the leaf made of 12 mm or 7 mm thick waterproof oak, pine or meranti plywood
- internal construction of the leaf in the form of a truss with polyurethane foam filling - 58 mm thick (7 mm plywood) and 48 mm thick (12 mm plywood)
- deaf stile made of pine+oak or pine+meranti wood, reinforced with sheet metal and a "C" profile
- hinge-side anti-burglary rebate

Door frame

- glued laminated timber with oak, pine or meranti glulam 100 mm x 60 mm
- aluminium threshold with a thermal separator or wooden threshold

Finishing

- painted three times using the dynamic method with water-soluble paints according to colour range or opaque RAL paints at an extra charge except RAL 9016 (white) and RAL 7016
- (anthracite) (page 99)

Dimensions

- ypical according to table (page 82)
- available in non-standard sizes at no extra charge for non-standard dimensions. The extra charge only applies to the following doors:
- higher than 212 cm and wider than 102 cm

Standard accessories

- 2 independent bolt locks, 72 mm spacing
- ofur hinges adjustable in three planes
- aluminium threshold with a thermal separator or wooden threshold
- decorative stainless steel sheets in selected models
- glazing unit with black painted glass with selected models

Equipment at an extra charge

- handle
- 35/65 cylinders
- grip
- biometric lock
- door viewer
 reed switch
- multipoint lock for 1 or 2 cylinders - multipoint lock for one or two

- electric strike - only for a

- cylinders
- wooden canopy (doors opening inwards)

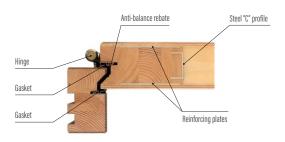

Cladded wooden threshold

Wooden frame 60 x 100 mm clad with natural mahogany-meranti, oak or pine veneer

Aluminium threshold with thermal insert 100 x 20 mm

EXTERIOR DOORS 82 mm

Heat transfer coefficient

Ud<0,78 W/m²K

Certificate No. ITB 831/B-2018-14

Material: oak, pine or meranti

Construction

- door leaf thickness 82 mm
- gasket in the leaf and frame
- rebated doors
- outer plating made from waterproof 12 mm or 7 mm thick mahogany meranti, oak or pine plywood
- internal construction of the leaf in the form of a truss with polyurethane foam filling of. 58 cm or 68 cm
- the stile of the frame made of pine+meranti or pine+oak wood, reinforced with sheet metal and a "C" profile
- hinge-side anti-burglary rebate

Door frame

- wood glued in layers with mahogany-meranti, oak or pine add-ons of 100 mm x 60 mm
- aluminium threshold with a thermal separator or wooden threshold

Finishing

 painted three times using the hydrodynamic method with watersoluble paints according to colour range or opaque RAL paints at an extra charge except RAL 9016 (white) and RAL 7016 (anthracite) (page 99)

Dimensions

- typical according to table (page 82)
- available in non-standard sizes at no extra charge for non-standard dimensions. The extra charge only applies to the following doors: higher than 212 cm and wider than 102 cm

Standard accessories

- multipoint lock for 1 cylinder, 72 mm spacing
- four hinges adjustable in three planes
- aluminium threshold with a thermal separator or wooden threshold
- decorative, stainless steel sheets in selected models:
- glazing unit with black painted glass in models: P120, P121, P122, P123, P124, P125, P126, P127

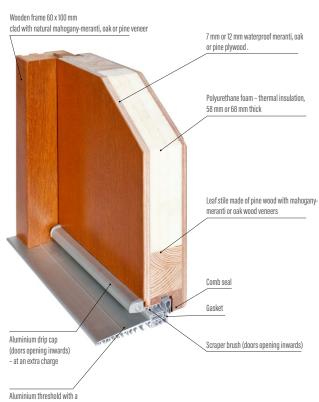

Equipment at an extra charge

- handle
- 45/65 cylinders
- grip
- biometric lock
- door viewer
- reed switch
- electric strike
 - Cladded wooden threshold

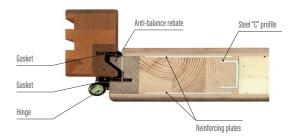

- multipoint lock for two
- cylinders
- thermal insulation insert for threshold
- aluminium drip cap (doors opening inwards)

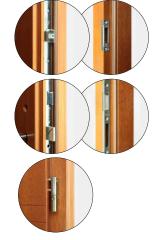

thermal insert 120 x 20 mm

EXTERIOR DOORS 102 mm

Heat transfer coefficient

Ud<0,63 W/m²K

Certificate No. ITB 831/B-2018-15

Material: meranti or oak

Construction

- door leaf thickness 102 mm
- gasket in the leaf and frame
- rebated doors
- outer plating made of 12 mm thick waterproof mahogany meranti or oak plywood
- internal construction of the leaf in the form of a truss with polyurethane foam filling of. 78 mm
- the stile of the frame made of pine+meranti or pine+oak wood, reinforced with sheet metal and a "C" profile
- hinge-side anti-burglary rebate

Door frame

- wood glued in layers with mahogany-meranti or oak add-ons of 100 mm x 80 mm
- aluminium threshold with a thermal separator or wooden threshold

E Finishing

 painted three times using the hydrodynamic method with watersoluble paints according to colour range or opaque RAL paints at an extra charge except RAL 9016 (white) and RAL 7016 (anthracite) (page 99)

Dimensions

- ypical according to table (page 82)
- available in non-standard sizes at no extra charge for non-standard dimensions. The extra charge only applies to the following doors: higher than 214 cm and wider than 106 cm.

Standard accessories

- multipoint lock for 1 cylinder, 92 mm spacing
- hinges adjustable in three "3D" planes
- aluminium threshold with a thermal separator or wooden threshold
- decorative stainless steel sheets in selected models

Equipment at an extra charge

- handle

LUXZONE

PIVOT EXTERIOR DOORS

WOODEN DOORS

Revolving doors, a departure from the hinges on standard side fixings.

- the leaf can be made in thickness 82 mm or 102 mm
- the permissible leaf weight is up to 500 kg
- the permissible plane leaf dimensions: 150 cm x 250 cm, and for doors with glass and milling: 120 cm x 250 cm
- every door can be additionally extended by means of permanent glazed or full frame extensions
- the latest technology and hinge fixtures allow the highest quality of manufacture anduse and lightweight opening, regardless of the weight of the leaf
- PIWOT DOOR prices are negotiated individually.

CO-FINANCING FOR EXTERIOR DOORS

The Priority Programme Clean Air gives the opportunity to obtain financial support for e.g. exterior doors. All entrance door models meet the requirements of the Clean Air programme.

TYPES OF GLAZING THAT CAN BE USED

ANTISOL

It is a solar control glass that is lightly tinted with a brown mass that reduces the transmission of solar energy. This prevents the rooms from overheating. Besides, it protects items sensitive to ultraviolet radiation.

REFLEX (stopsol)

It is a glass with enhanced solar control. Improving the visual effect and giving a sense of privacy. This effect is achieved by applying metal oxides to one side of the glass. Those on the lighter side of the mirror can see their reflection and are visible to those on the darker side. If a person on the lighter side gets very close to the glass, they can see objects on the darker side.

ONE-WAY MIRROR (phoenician)

It is a glass pane coated with metal oxide on both sides. Typically used as a partition between rooms, one of which is darkened. Those on the lighter side of the mirror can see their reflection and are visible to those on the darker side.

MILK GLASS

It is a glass covered on one side with satin-matt varnish, thanks to which it "lets" the light in, but becomes opaque.

P4 ANTI-BURGLARY

It consists of two layers of clear glass, between which there is an anti-burglary film. Thanks to the film, the glass does not fall into small pieces when broken. Radially spreading cracks form at the point of impact. P4 glass is only available as clear glass.

SAFETY GLASS 33.1

It is the one, which minimises health hazard for people staying near glazing and in glazed rooms. Debris from broken glass, as well as fire, gases and thermal radiation – symptoms accompanying fires – can pose a danger. A glass is called "safety" if the technique of its manufacture or combination helps to limit damage from possible deformation, impact or fire.

The 33.1 marking indicated that 2 panes of 3 mm glass and one layer of a film were used. The 33.1 safety glass 33.1 belongs to the 02 glass class. It is most often used in flats, schools, offices. It provides protection against injury>It can also be used in buildings with an internal explosion hazard

SANDBLASTED GLASS

In the sandblasting process, the glass undergoes a mechanical tarnishing process using a high-pressure stream of sand. This process makes it possible to decorate the glass with any designs from our catalogues or patterns provided by the customer. You can get the effect of a matt pattern or, conversely, a translucent pattern.

EXTRA CHARGES FOR NON-STANDARD ORDERS

EXTERIOR DOORS

	EXTRA CHARGES FOR NON-STANDARD ORDERS
Item	Description
1.	No extra charge for doors narrower than 102 cm and lower than 212 cm (thickness: 72 mm and 82 mm)
2	Extra charge for wider doors:
a)	Wider doors up to a total width of 106 cm (door thickness: 72 mm and 82 mm)
b)	Wider doors up to a total width of 110 cm (door thickness: 102 mm)
c)	Doors with an overall width of 107 cm to 111 cm (door thickness: 72 mm and 82 mm)
d)	Doors of overall width from 111 cm to 115 cm (door thickness: 102 mm)
e)	Extra charge for door size "100" (112 x 208.2/210 - door thickness: 72 mm and 82 mm), (116x210.2/212 - door thickness: 102 mm)
3	Extra charge for higher door (without fanlight):
a)	Ranging from 212 to 215 cm + 15% of a typical door
b)	Ranging from 215 to 224 cm + 30% of a typical door
c)	Ranging from 224 to 250 cm + 40% of a typical door
4	Side extension for an overall door width of up to 150cm:
a)	Opening, with glazing + 75% of single door value
b)	Opening, without glazing + 70% of single door value
c)	Fixed leaf imitation without glazing + 50% of single door value
d)	Fixed glazed leaf imitation + 60% of single door value
e)	Fixed in frame – mahogany-meranti (regardless of the overall width)
f)	Fixed in frame – oak (regardless of the overall width)
g)	Fixed in frame – pine (regardless of the overall width)
5	Side extension with overall door width from 151cm to 170cm:
a)	Opening, with glazing + 95% of single door value
b)	Opening, without glazing + 90% of single door value
C)	Fixed glazed leaf imitation + 85% of single door value
d)	Fixed leaf imitation without glazing + 80% of single door value
e)	Fixed in frame – mahogany-meranti (regardless of the overall width)
f)	Fixed in frame – oak (regardless of the overall width)
g) 6	Fixed in frame – pine (regardless of the overall width) Extra charge for double doors from 171 to 196cm width is + 110% of single door value
7	Frame fixed extensions and fanlight
a)	Fixed in frame – mahogany-meranti
b)	Fixed in frame – oak (regardless of the overall width)
c)	Fixed in frame – pine (regardless of the overall width)
d)	Fixed imitation door leaf up to total door height of 250cm + 50% of the door value
8	EXTRA CHARGES - COLOUR
a)	Colour from the RAL range (single door), except Ral 9016 (white) and Ral 7016 (anthracite)
b)	Double-colour doors
9	Extra charge for changing the glazing
a)	Fixed extra charge for changing the glazing e.g. one-way mirror, milk glass, sandblasted glass, P4, REFLEX GRAFIT, black REFLEX, ANTISOL black
10	Frame thickness: for 10 mm/mb (pine, oak, meranti)
11	Widening of the frame to the wall width in the form of a tunnel:
2)	material mahogany-meranti per cm
a)	adjustable mahogany-meranti headband
b)	material oak for every cm
5)	adjustable band oak
c)	material pine for every cm
0)	adjustable band pine
12	Covering bands 10 mm x 60 mm set per side
